

THERMO KING WEST PARTS DEPARTMENT

Our Parts Department specialises in dealing with only genuine parts. We stock:

- Thermo King & Carrier Truck and Trailer Refrigeration parts
- Thermo King, Carrier & Coach Air Bus Air Conditioning parts
- Anteo Tail Lift parts
- Caroil Disabled Lifts parts

We are one of the largest genuine Thermo King Parts stores in Australia holding more than 4000 different items in stock at any given time.

But we also understand that we can never have everything in stock so we have gone to great lengths to build a national and international supply chain. If our customers require an item that we don't have directly available then we can obtain it from a number of fellow dealerships in the country or direct from our suppliers in the USA, Europe or China. We are able to have the item generally in store within 1 to 10 working days without blowing out the freight cost to the customer.

The staff within the Parts Department truly strive to provide customers with the absolute best and most professional service possible.

“When you invest in a Thermo King unit you not only get the most Advanced Temperature Management system available, you also get back up service second to none.”

Precedent began as a complete blank slate. Innovative strategies were brought to the table. Tried-and-true methods were held to higher standards. New technologies were considered, some didn't make the cut.

In the end, we arrived at a platform that delivers double-digit fuel savings without the uncertainty of future compliance.

Diesel-electrical vs. diesel-mechanical. It was the central debate when deciding Precedent's architectural framework.

Instead of choosing one, we chose the best of both.

Our new platform utilizes an all-new architecture to drive optimum efficiencies and double-digit fuel savings across all applications.

BULKHEADS

Coolguard Bulkhead is the industry's most economical bulkhead. 250mm "Uni-Top" Foam seal allows for bulkheads to be used in a flexible Truck & Trailer. Internal height range of 2730mm to 2670mm without requiring any modifications.

- Light Weight - only 25kg (per set), 12.5kg each panel
- Vertical stiffening rods (2 per panel) within a 60mm thick closed compact foam insulation core. Heat-sealed polyurethane perimeter seals enclosed in 18oz reinforced black vinyl for lasting performance
- Robust panel skin finished in blue vinyl
- Heavy duty 250mm formed HDPE base skid guard
- Actual panel dimensions 60mm thick x 1210mm wide x 2740mm high (2 x panels)

Anteo Tail Lifts are the product of clever engineering, high grade materials and skilled craftsmanship. These lifts make extensive use of advanced aluminium alloys and high strength steel to provide strength and rigidity without suffering the weight disadvantage of so many other manufacturers.

Anteo Benefits:

- Manufactured to the strictest specifications
 - Thoroughly tested before being released from the factory
 - Backed by the enviable reputation for excellence in design and manufacture
 - Comes with a full 48 months warranty
 - Safe and reliable
 - Factory tested
 - Premium finish
 - Premium tail lift
- Cantilever • Retractable • Tuckaway
