

CargoWatch™ Food-Safe Temperature Sensor
Accurately monitor cargo temperature within individual pallets.

CargoWatch™ Food-Safe Temperature Sensor

Monitor temperature where it matters- at the product!

- Provides accurate cargo temperature measurement and recording throughout transport
- Minimize reports of false temperature swings caused by temporary air temperature changes
- Both cargo and air temperature can be downloaded locally or remotely via TracKing
- When connected via TracKing, you can remotely monitor cargo temperature, ensure temperature is accurately set and be notified if the product level temperature is out of range
- Cargo temperature history stored in the Thermo King reefer unit datalogger
- Food-safe NSF stainless steel construction with accuracy of +/- 1°C
- Can be mounted to reels or coiled spiral harness for out-of-the-way storage when not in use
- Up to six sensors can be use per truck or trailer
